

HEALTH AND SAFETY IN THE FOOD AND DRINK MANUFACTURING INDUSTRY

The Health & Safety Executive (HSE) reports that even though the injury rate for the food and drink manufacturing industry has dropped by over one third since 1990/1, a quarter of all manufacturing injuries still occur in the food industry.

So as to provide a focal point for the Food industry on the common causes of injury and occupational ill health, the HSE has dedicated several web pages to our industry. These web pages also provide direct access to guidance documents for key Health and Safety areas.

For further information these web pages can be accessed through the following web link :

www.hse.gov.uk/food/index.htm
